

How does MJog enable closer engagement with your Patients?

Confirm and remind their appointments by SMS, Voice and Email

Conduct FREE Patient surveys with automatic handling of results

Patients can cancel unwanted appointments 24/7 with text back

Invite Patients to join PPG/PRG groups

Send chronic disease invites and recalls through Patients preferred channels

Use pre-configured messages to manage long term conditions

“We have been using MJog for chronic diseases, including asthma invites. Patients have found it extremely useful to be able to automatically cancel their appointments, by texting us back. Those responses are then recorded automatically.”

What benefits does MJog bring your Practice?

Increase Practice income and significantly lower communication costs

Reduce clinical team, admin and staff time

Improve Patient experience and engagement

Reduce DNAs

“MJog has enabled us to gather a lot of patient information that we would not have been able to get unless we called patients or saw them face to face, such as their smoking status... which is then put directly into the patient’s record so there is no need for us to manually input codes. MJog allows us to easily send our patients information about where they can get help with quitting smoking.”
